

# Proposed Pedestrian Network

## Legend

- |                     |  |
|---------------------|--|
| <b>Base Layer *</b> | <b>Sidewalk Network and Prioritization</b> |
| — Streets           | — Long Term                                |
| ■ Buildings         | — Mid Term                                 |
| <b>m</b> Schools    | — Short Term                               |
| <b>J</b> Parks      | — Existing                                 |
| — Railway           | — Sidewalk                                 |
| — Lakes and Ponds   | xxxxxxx Multi Use Path                     |

1 inch equals 0.157338 miles

\* Base layer information provided by Gainesville Hall County GIS

The specific facility types designated on this map are based on analysis and discussion at the time of this study. It is the intent of this Plan that facility type be re-examined at the time a specific project is proposed or related road corridor improvements go into preliminary engineering. Final analysis should consider changes in land use, traffic characteristics, and parallel facilities, as well as any financial or design constraints.
