# Conformity Determination Report – Short Form

## Gainesville-Hall Metropolitan Transportation Planning Process

Regional Transportation Plan: **GHMPO 2050 RTP: 2020 Update**

Transportation Improvement Program: **FY 2024-2027**

### Nature of Action:

- ☐ Administrative Modification
- ☒ Amendment - Number **1**
  - ☒ Planning Action Only
  - ☐ New Emissions Analysis Required

*A full list of all proposed changes is attached to this form. GHMPO is amending its RTP and TIP to program funds for two projects that both plan to widen State Route 60/Thompson Bridge Road, per request from Georgia Department of Transportation (GDOT). Funds for the project have been identified by GDOT. Such a Planning Action Amendment does not impact financial constraint of the TIP or RTP, as any increase in federal funds will be drawn from existing program balances, as verified by GDOT. There are also no changes to the scope or schedule of any non-exempt status project, as defined in 40 Code of Federal Regulations Part 93, which would require updating the regional emissions analysis. Therefore, the TIP and/or RTP remains fiscally constrained and the conformity determination is relying on the previous regional emissions analysis. See below for the conformity process schedule.*

*The Gainesville-Hall MPO falls under the 1997 Ozone Standards. For the 1997 ozone NAAQS areas, transportation conformity for MTPs and TIPs for the 1997 ozone NAAQS can be demonstrated without a regional emissions analysis, per 40 CFR 93.109(c). This provision states that the regional emissions analysis requirement applies one year after the effective date of EPA's nonattainment designation for a NAAQS and until the effective date of revocation of such NAAQS for an area. The 1997 ozone NAAQS revocation was effective on April 6, 2015, and the South Coast II court upheld the revocation. As no regional emission analysis is required for this conformity determination, there is no requirement to use the latest emissions model, or budget or interim emissions tests.*
