The Georgia Department of Transportation Group Transit Asset Management Plan Authorization

The Georgia Department of Transportation (GDOT) has completed the update of the Group Transit Asset Management Plan (Group TAM Plan) for Tier 2 subrecipients to comply with the Federal Transit Administration's (FTA's) deadline of October 1, 2026.

This Group TAM Plan includes updates to State of Good Repair (SGR) performance goals related to the FTA's SGR measures for revenue vehicles, non-revenue vehicles, and facility asset classes.

The Group TAM Plan will be shared with the appropriate Metropolitan Planning Organizations within Georgia for inclusion in their amended Metropolitan Regional Transportation Plans.

GDOT is dedicated to overseeing the development, implementation, operation, and continual improvement of the asset management practices that encourage our subrecipients to operate their transit systems in a State of Good Repair.

The GDOT Group TAM Plan details how GDOT will work with our subrecipients to achieve asset management goals and objectives, prioritize direct investments, and allocate resources to achieve the plan's objectives.

Approval

_____ **Date:** October 1, 2026

Clement Solomon, PhD, GDOT Director, Division of Intermodal, Aviation, Rail, Transit & Waterways
(Accountable Executive, Georgia Department of Transportation)

1. Executive summary

The Georgia Department of Transportation (GDOT) has developed this Group Transit Asset Management (TAM) Plan on behalf of 64 participating Tier II transit providers in accordance with Federal Transit Administration (FTA) requirements. Transit Asset Management is a business model that uses asset condition information to support investment decision making to keep transit assets in a State of Good Repair (SGR).

This document represents the 2026 update to GDOT's Group TAM Plan and builds upon the previous TAM planning cycle. The update incorporates current asset inventory and condition information to inform SGR needs and investment priorities for the FY2027-FY2030 planning horizon.

In accordance with FTA regulations, this TAM Plan covers a four-year period and includes the following core elements:

- Inventory of capital assets used to provide public transit within three categories: Rolling Stock, Equipment, and Facilities
- Condition assessment of inventoried assets for which a transit provider has direct capital responsibility.
- Use of a decision support tool to analyze asset and condition data and develop a methodology to prioritize those assets' state of good repair re-investment needs.
- Prioritized list of investments based on the decision support tool and projected funding reasonably estimated to be available over the four-year period.

The 64 participants in GDOT's Group TAM Plan are comprised of the following categories of transit providers:

- Rural Program Section 5311 GDOT subrecipients: 54
- Small Urban Section 5307 GDOT subrecipients: 11

  One participating agency receives funding under both programs.

The agencies included in this update reflect current eligibility and participation decisions for the FY2027-FY2030 planning cycle. GDOT has developed this TAM Plan in collaboration with participating agencies.

Key summary outputs from this TAM Plan include the following:

- The GDOT Group TAM Plan inventory includes 1,272 assets, consisting of 822 revenue vehicles, 347 equipment assets (including support vehicles), and 103 facilities, with an estimated replacement value exceeding $433 million.
- Approximately 211 revenue vehicles, 148 equipment assets, and one facility are currently not meeting the established state of good repair threshold, representing identified reinvestment needs across the GDOT Group TAM portfolio.
- The current state of good repair backlog for assets under participating agencies' capital responsibility is estimated at approximately $87.9 million, of which revenue vehicles account for approximately $58.4 million (66%), making vehicle replacement the highest investment priority.
- Constrained funding analysis indicates that the anticipated Section 5311 revenue vehicle funding levels are sufficient to reduce the rural vehicle backlog by approximately 30 percent over the planning horizon, while the Section 5307 vehicle backlog is projected to grow under currently anticipated funding levels, particularly for large transit buses.

Each participant's Accountable Executive must approve this Group TAM Plan. A record of those approvals is provided in Appendix D.

Consistent with FTA requirements, this TAM Plan will be updated at least every four years.

2. Introduction

2.1 Plan Background and Purpose

In July 2012, the U.S. Congress enacted the MAP-21 (Moving Ahead for Progress in the 21st Century) Act, which directed the Federal Transit Administration (FTA) to establish Transit Asset Management (TAM) requirements. In July 2016, FTA issued the Final Rule establishing requirements for Transit Asset Management (TAM), which apply to recipients and subrecipients of FTA funds. This was part of an overall federal initiative to improve the state of good repair of transportation assets throughout the nation.

The FTA Final Rule has different requirements based on the relative size of the transit provider. The TAM Plan requirements for smaller transit providers (referred to as Tier II providers) are less extensive than those for larger Tier I providers. All providers participating in this Georgia Department of Transportation (GDOT) Group TAM Plan are Tier II providers.

In accordance with 49 CFR §625.25, TAM Plans for Tier II transit providers are required to include the following four (4) elements:

- An inventory of the number and type of capital assets
- A condition assessment of the inventoried capital assets for which the provider has direct capital responsibility.
- A description of analytical processes or decision-support tools used to estimate capital investment needs over time and develop the investment prioritization.
- A project-based prioritization of investments

Tier I and Tier II Providers

Tier I provider means a recipient that owns, operates, or manages either.

1. one hundred and one (101) or more vehicles in revenue service during peak regular service across all fixed route modes or in any one non-fixed route mode, or
2. rail transit.

Tier II provider means a recipient that owns, operates, or manages.

1. one hundred (100) or fewer vehicles in revenue service during peak regular service across all non-rail fixed route modes or in any one non-fixed route mode,
2. a subrecipient under the 5311 Rural Area Formula Program,
3. or any American Indian tribe.

Source: 49 CFR §625.5 Definitions

The fundamental purpose of the TAM Plan is to help maintain transit assets in a state of good repair (SGR). As stated in 49 CFR §625.17 of the FTA TAM Final Rule, "A capital asset is in a state of good repair if it is in a condition sufficient for the asset to operate at a full level of performance."

2.2 Group TAM Plan Sponsor

The FTA TAM Final Rule allows state departments of transportation to sponsor Group TAM Plans on behalf of Tier II transit providers. GDOT, which administers FTA grant funding for subrecipients under the Section 5307 and Section 5311 programs, sponsors this Group TAM Plan on behalf of participating Tier II transit providers within the State of Georgia. Most participants in this Group TAM Plan are subrecipients of either FTA Section 5307 or Section 5311 funds administered by GDOT. In accordance with 49 CFR §625.27, GDOT has developed this Group TAM Plan covering the FY2027-FY2030 planning period.

As the Group Plan Sponsor, GDOT is responsible for coordinating the development of and submitting the Group TAM Plan. This also includes establishing performance targets applicable to the participants in the Group Plan. As the Group Plan Sponsor, GDOT is also responsible for reporting TAM asset performance measures to the National Transit Database (NTD) in coordination with Group TAM Plan participants.

2.3 Group TAM Plan Participants

There are 64 participants in this Group TAM Plan. The 64 providers are organized into two (2) sub-groups: Rural Section 5311 subrecipients and Small Urban Section 5307 subrecipients.

Group TAM Plan Participation

A sponsor must develop a Group TAM Plan for its Tier II provider subrecipients, **except those subrecipients that are also direct recipients under the 49 U.S.C. §5307 Urbanized Area Formula Grant Program**. The Group TAM Plan must include a list of those subrecipients that are participating in the Plan.

Source: 49 CFR §625.27(a)(1)

Table 2-1 provides a summary of the Group TAM Plan participants.

Participation in the GDOT Group TAM Plan is governed by 49 CFR §625.27. Under the regulation, Tier II providers may participate in only one Group TAM Plan. A Tier II provider that chooses to opt out of a Group TAM Plan must either develop its own TAM Plan or participate in another sponsor's Group TAM Plan. Certain direct recipients under the Section 5307 Urbanized Area Formula Grant Program are not included in the GDOT Group TAM Plan and maintain their own TAM Plans.

The participants are responsible for cooperating with GDOT in the development of the Group TAM Plan and designating an Accountable Executive. The Accountable Executive is required to approve the Group TAM Plan on behalf of their agency. The Accountable Executive must balance transit asset management, safety, day-to-day operations, and expansion needs in approving and carrying out a TAM Plan.

Figure 2-1 shows each participant's location within the state. A listing of participants by sub-group is provided in Sections 2.3.1 and 2.3.2, respectively.

Figure 2-1 GDOT 2026 Group TAM Plan Participants Map

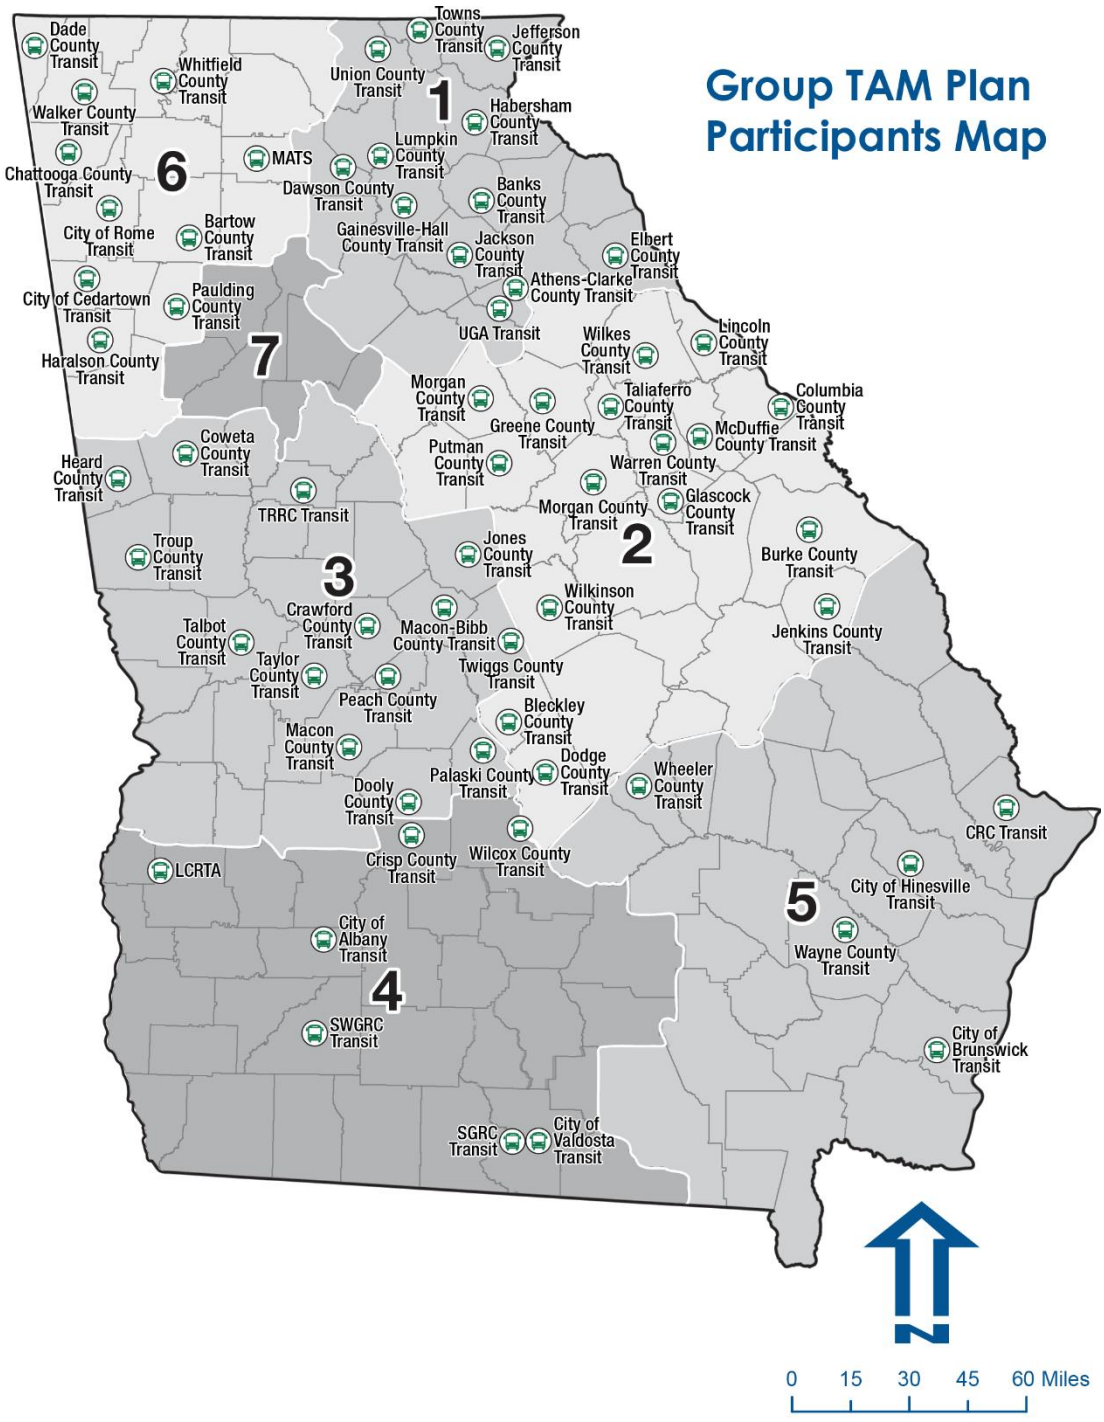

Table 2-1 Summary of Group TAM Plan Participants

Participant sub-group	Primary transit service provided	Number of participants	Participants
Rural 5311 subrecipients	Demand response	54	See list of participants in Section 2.3.1 below.
Small Urban 5307 subrecipients	Fixed route bus, demand response	11	See list of participants in Section 2.3.2 below.
Total		64*	

* Total reflects unique participants. Participants receiving both 5311 and 5307 funding are counted under both sub-groups.

2.3.1 Rural 5311 Program Participants List

1. **Banks County Transit**
2. **Bleckley County Transit**
3. **Burke County Transit**
4. **Chattooga County Transit**
5. **City of Cedartown Transit**
6. **Coastal Regional Commission (CSRC) Transit**
7. **Columbia County Transit**
8. **Coweta County Transit**
9. **Crawford County Transit**
10. **Crisp County Transit**
11. **Dade County Transit**
12. **Dawson County Transit**
13. **Dodge County Transit**
14. **Dooly County Transit**
15. **Elbert County Transit**
16. **Glascock County Transit**
17. **Greene County Transit**
18. **Habersham County Transit**
19. **Hancock County Transit**
20. **Haralson County Transit**
21. **Heard County Transit**
22. **Jackson County Transit**
23. **Jefferson County Transit**
28. **Lumpkin County Transit**
29. **Macon County Transit**
30. **McDuffie County Transit**
31. **Morgan County Transit**
32. **North Georgia Community Action, INC (MATS)**
33. **Paulding County Transit**
34. **Peach County Transit****
35. **Pulaski County Transit**
36. **Putnam County Transit**
37. **South West Georgia Regional Commission (SWGRC) Transit**
38. **Southern Georgia Regional Commission (SGRC) Transit**
39. **Talbot County Transit**
40. **Taliaferro County Transit**
41. **Taylor County Transit**
42. **Three Rivers Regional Commission (TRRC) Transit**
43. **Towns County Transit**
44. **Troup County Transit**
45. **Twiggs County Transit**
46. **Union County Transit**
47. **Walker County Transit**
48. **Warren County Transit**
49. **Wayne County Transit**
50. **Wheeler County Transit**

24. **Jenkins County Transit**
25. **Jones County Transit**
26. **Lincoln County Transit**
27. **Lower Chattahoochee Regional Transit Authority (LCRTA)**
51. **Whitfield County Transit**
52. **Wilcox County Transit**
53. **Wilkes County Transit**
54. **Wilkinson County Transit**

**Receives both 5307 and 5311 funding

2.3.2 Small Urban 5307 Program Participants List

1. **Athens-Clarke County Transit**
2. **Bartow County Transit**
3. **City of Albany Transit**
4. **City of Brunswick Transit**
5. **City of Hinesville Transit**
6. **City of Rome Transit**
7. **City of Valdosta Transit**
8. **Gainesville-Hall County Transit**
9. **Macon-Bibb County Transit Authority (MBCTA)**
10. **Peach County Transit****
11. **University of Georgia (UGA) Transit**

**Receives both 5307 and 5311 funding

3. Methodology and Process

3.1 GDOT Outreach

As the Group TAM Plan Sponsor, GDOT coordinated development of the Plan with participating transit providers. GDOT wanted development of the Plan to be a collaborative process involving participants throughout the update.

Two kickoff meetings were conducted to accommodate participant schedules and provide an overview of the TAM Plan update process, participation requirements, data needs, and project schedule.

Participating agencies were then contacted via email to confirm participation in the Group TAM Plan and identify agency points of contact and Accountable Executives to support project coordination. Agency-specific asset inventory information was subsequently provided for review and validation. Agencies were responsible for reviewing existing inventory records, identifying updates or corrections, and providing any additional information needed to support development of the Plan.

Follow-up coordination through emails and phone calls was conducted throughout the project to address data gaps, resolve inconsistencies, verify submitted information, and respond to participant questions.

3.2 Data Collection

Data used to develop the asset inventory were compiled from multiple sources, including the 2022 GDOT Group TAM Plan, the 2025 NTD records, the BlackCat Transit Data Management System records as of July 1, 2026, and information provided and validated by participating transit providers.

The asset inventory includes assets owned by participating transit providers, as well as third-party assets used in the provision of public transportation and is organized into three asset categories: Rolling Stock (Revenue Vehicles), Facilities, and Equipment.

Facility data were supplemented through field condition assessments conducted at federally funded facilities associated with participating agencies to support development of the Plan.

3.3 Data Analysis

The finalized asset inventory and associated condition information were used to evaluate asset performance, establish performance targets, and support the prioritization of future investments. The FTA TERM Lite tool was the primary decision-support tool used to prioritize rolling stock and equipment assets. Facility rehabilitation projects were prioritized using facility condition information, facility age, and available funding within an investment year.

The decision-support tool and investment prioritization process are described in greater detail in Chapters 6 and 7. The following chapter presents the Capital Asset Inventory.

4. Capital Asset Inventory and Condition

4.1 Introduction

The Capital Asset Inventory for the GDOT Group Transit Asset Management Plan comprises all rolling stock, equipment, and facility assets owned, operated, and/or maintained by participating transit providers in support of public transportation services.

Asset Inventory

Asset inventory means a register of capital assets, and information about those assets.

Source: 49 CFR §625.5 Definitions

Federal law defines public transportation as "regular, continuing shared-ride surface transportation services that are open to the general public or open to a segment of the general public defined by age, disability, or low income; and does not include:

- Intercity passenger rail transportation.
- Intercity bus service.
- Charter bus service.
- School bus service.
- Sightseeing service.
- Courtesy shuttle service for patrons of one or more specific establishments; or
- Intra-terminal or intra-facility shuttle services (49 U.S.C. §5302(15)).”

The asset inventory is maintained within the TERM Lite decision-support tool, which is described in Chapter 6.

The asset inventory serves as the foundation for condition assessment, performance target setting, and investment prioritization activities described later in this Plan.

The sections that follow provide summaries of the count and condition of the different asset types contained in the inventory. A detailed listing of the entire inventory is provided in Appendix B. The inventory is current as of July 1st, 2026.

4.2 Asset Condition

The condition of rolling stock and equipment assets was determined through a comparison of asset age and its Useful Life Benchmark (ULB).

The ULB is a TAM measure and should be distinguished from FTA grant minimum useful life requirements. Table 4-1 summarizes the Useful Life Benchmarks applied to the rolling stock and equipment asset classes included in the inventory.

Useful Life Benchmark (ULB)

Useful life benchmark (ULB) means the expected life cycle or the acceptable period of use in service for a capital asset.

Source: 49 CFR §625.5 Definitions

The Useful Life Benchmarks (ULBs) established in the 2022 TAM Plan have been used to support annual asset condition assessments and National Transit Database (NTD) reporting. As part of the 2026 TAM Plan update, GDOT conducted a comprehensive review of the existing ULBs and revised several values based on current asset inventories, historical performance data, maintenance practices, observed service life, and vehicle classifications by mode and VIN-specific characteristics. As a result, the inventory and resulting counts were updated to correctly align to the manufacture and use of each vehicle type. These updates were developed to align the ULBs more accurately reflect the maximum useful life that assets can reasonably be expected to achieve under normal operating conditions.

Several ULBs were adjusted to better align with actual asset performance and industry experience. For example, the Trolleybus ULB was revised from 25 years to 14 years because the previous benchmark reflected the expected service life of steel-wheel trolley vehicles rather than the rubber-tired trolleybuses operated by GDOT subrecipients. Similar adjustments were made where existing benchmarks were determined to be inconsistent with current fleet composition, asset utilization, maintenance history, or demonstrated service life.

Because these revised ULBs will be applied beginning with the FY2027 reporting year, there may be slight changes in the number of assets reported as being beyond their Useful Life Benchmark and, therefore, classified as not being in a State of Good Repair (SGR). In some cases, increasing a ULB may result in assets that previously exceeded the benchmark being reported as within their useful life. For example, equipment vans reported in FY2026 were considered 100 percent beyond their ULB based on a six-year benchmark. With the ULB increasing to eight years for FY2027, some of these vehicles may no longer be considered beyond their useful life benchmark and may therefore be reported as meeting SGR performance criteria.

The revised ULBs are intended to represent expected service life under normal operating conditions and are based on GDOT's assessment of asset performance, operating environment, maintenance practices, and replacement experience. As such, these benchmarks may differ from replacement planning assumptions, funding strategies, or Federal Transit Administration (FTA) minimum useful life requirements, which serve different planning and programmatic purposes.

Table 4-1 GDOT Useful Life Benchmarks (ULBs)

Asset Category	Asset Class	2022 ULB	Updated ULB
Revenue Vehicles			
	BU - Bus (<= 30')	12 years	12 years
	BU - Bus (>30')	14 years	14 years
	CU - Cutaway Bus	5 years	7 years
	MV – Minivan	6 years	8 years
	TB - Trolleybus	25 years	14 years
	VN - Van	6 years	8 years
Equipment			
	AO - Automobile	8 years	8 years
	Trucks and Other Rubber Tire Vehicles	8 years	10 years
	SV - Sports Utility Vehicle	8 years	8 years

	VN - Van	6 years	8 years
	Equipment >$50,000	varies	10 years

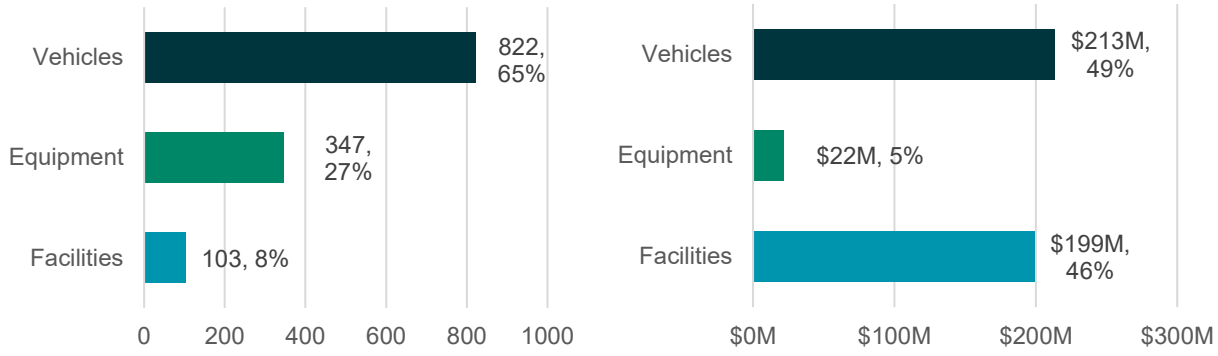

The updated ULBs were used in the development of this TAM Plan to evaluate current asset conditions, estimate asset performance over the planning horizon, and support investment prioritization and replacement planning. For NTD reporting purposes, however, the updated ULBs will first be applied beginning with the FY2027 reporting cycle. Historical NTD performance results through FY2026 were developed using the ULB values in effect at the time of reporting.

Transit facilities were evaluated for condition using the FTA Transit Economic Requirements Model (TERM) Scale. Condition assessments were conducted in accordance with the FTA TAM Facility Performance Measure Reporting Guidebook. In the summer of 2026, facility data were supplemented through field condition assessments conducted at federally funded facilities for which participating agencies have direct capital responsibility. Each facility was rated at the sub-component level in accordance with the FTA TERM Condition Assessment Scale. The TERM rating scale and methodology used to calculate overall facility ratings are included in Appendix A.

4.3 Overview of Asset Inventory

The combined asset inventory contains 1,272 assets with a total replacement cost of over $433 million. This comprises 822 revenue vehicles, 347 pieces of equipment (including non-revenue vehicles), and 103 facilities that support public transit service. Figure 4-1 shows the distribution of assets and replacement cost by asset category. Asset counts are based on all assets included in the inventory, while replacement costs (2026 dollars) are reported only for assets under the capital replacement responsibility of participating agencies.

Figure 4-1: Share of Asset Inventory and Replacement Cost by Asset Category

Error! Reference source not found. summarizes the combined asset inventory by asset class and type, including asset counts, average age, mileage or condition ratings, useful life benchmarks, assets exceeding useful life benchmarks or with TERM ratings below 3.0, and replacement cost estimates.

Table 4-2: Summary of Combined Asset Inventory by FTA Asset Class

Asset Class/Type	Total Number	Average Age (years)	Average Mileage/TERM Rating	ULB (Years)	Number Exceeding ULB/TERM Rating<3.0	Average Replacement Cost ($2026)
Rolling Stock (Revenue Vehicles)						
BU - Bus (<= 30')	10	5.90	103,824.80	12	0	$650,000.00
BU - Bus (35' - 40')	135	8.33	155,499.16	14	15	$863,703.70
CU - Cutaway Bus	574	4.59	95,791.94	7	183	$130,069.69
MV - Minivan	40	3.88	33,680.19	8	2	$90,000.00
TB - Trolleybus	4	3.50	13,505.75	14	0	$500,000.00

VN - Van	59	5.31	92,454.77	8	11	$169,220.34
Rolling Stock (Revenue Vehicles) Subtotal	**822**	**5.23**	**103,501.86**		**211**	**$259,542.58**
Equipment						
AO - Automobile	20	5.45	174,299.00	8	4	$40,000.00
SV - Sports Utility Vehicle	18	6.67	4,453.00	8	6	$53,333.33
Trucks and Other Rubber Tire Vehicles	12	11.75		10	8	$73,333.33
VN - Van	5	7.80		8	2	$135,000.00
Bus Washer	3	19.67		10	2	$142,777.60
Cart	2	6.00		10	1	$7,564.81
CNG Refueling Station	1	8.00		25	0	$2,522,235.87
Fuel Island	3	11.33		25	0	$46,015.14
Fuel Tank	2	33.00		30	2	$794,532.90
Hoist	1	1.00		20	0	$858.44
Lifts - Fixed	15	11.27		20	0	$36,923.28
Lifts - Portable	7	13.00		10	7	$38,535.19
Misc. Equip	253	9.58		10	113	$49,501.20
Pollution Treatment	1	11.00		20	0	$13,878.03
Scrubber, Sprayer	4	11.50		10	3	$48,088.05
Equipment Subtotal	**347**	**9.60**			**148**	**$62,139.18**
Facilities* **						
Administrative Office	58	33.95	4.03		0	$4,323,005.33
Administrative Office/Maintenance Facility	7	46.71				
Maintenance Facility	29	35.69	3.81		1	$5,270,339.38
Parking Facility	2	13.50				
Passenger Facility	4	35.00	3.93		0	$36,967,172.64
Vehicle Fueling	3	8.67	4.38		0	$1,616,420.00
Facilities Subtotal	**103**	**34.21**	**3.94**		**1**	**$9,039,001.83**
Grand Total	**1,272**					

*** Asset counts and average age are based on all assets included in the inventory. Condition ratings, assets with TERM ratings below 3.0, and replacement cost estimates are reported only for assets under the capital replacement responsibility of participating agencies.

4.4 Rolling Stock

The rolling stock asset category comprises vehicles used in revenue service for public transportation. The complete rolling stock (revenue vehicles) inventory is provided in Appendix B.1. For each asset, the inventory contains the following information:

- Record Number
- Organization
- Vehicle Identification Number (VIN)
- Description
- Make/Model

- Vehicle Type
- Vehicle Year
- Mileage
- Useful Life Benchmark (ULB)
- Funding Program
- Replacement Cost ($2026)

Table 4-3 summarizes the rolling stock inventory by funding sub-group: Rural (5311) and Small Urban (5307). Averages were calculated within each sub-group.

Table 4-3: Summary of Rolling Stock (Revenue Vehicles) by Sub-Group

Sub-Group/ Vehicle Type	Total Number	Average Age (years)	Average Mileage	ULB (years)	Number Exceeding ULB	Average Replacement Cost ($2026)
Rural 5311 Funding Program						
CU - Cutaway Bus	510	4.54	99,501.41	7	156	$128,029.41
VN - Van	24	6.54	116,223.35	8	9	$167,750.00
Rural 5311 Subtotal	**534**	**4.63**	**100,092.41**		**165**	**$129,814.61**
Urban 5307 Funding Program						
BU - Bus (<= 30')	10	5.90	103,824.80	12	0	$650,000.00
BU - Bus (35' - 40')	135	8.33	155,499.16	14	15	$863,703.70
CU - Cutaway Bus	64	5.05	64,497.53	7	27	$146,328.13
MV - Minivan	40	3.88	33,680.19	8	2	$90,000.00

Urban 5307 Subtotal	**288**	**6.36**	**110,278.48**		**46**	**$500,079.86**
Grand Total	**822**	**5.23**	**103,501.86**		**211**	**$259,542.58**

4.5 Equipment

The equipment asset category comprises non-revenue (service) vehicles and other support equipment assets used in transit operations and maintenance activities. The complete equipment inventory is provided in Appendix B.2.

For each equipment asset, the inventory records the following information:

- Record Number
- Organization
- Description
- Make/Model
- Asset Type
- Asset Year
- Mileage (if applicable)
- Useful Life Benchmark (ULB)

- Funding Program
- Replacement Cost ($2026)

Table 4-4 summarizes the equipment inventory by funding sub-group: Rural (5311) and Small Urban (5307). Averages were calculated within each sub-group.

Table 4-4: Summary of Equipment Assets by Sub-Group

Sub-Group/ Asset Type	Total Number	Average Age (years)	Average Mileage	ULB (years)	Number Exceeding ULB	Average Replacement Cost ($2026)
Rural 5311 Funding Program						
SV - Sports Utility Vehicle	1	1.00	4,453.00	8	0	$50,000.00
Rural 5311 Subtotal	**1**	**1.00**	**4,453.00**		**0**	**$50,000.00**
Urban 5307 Funding Program						
AO - Automobile	20	5.45	174,299.00	8	4	$40,000.00
SV - Sports Utility Vehicle	17	7.00		8	6	$53,529.41
Trucks and Other Rubber Tire Vehicles	12	11.75		10	8	$73,333.33
VN - Van	5	7.80		8	2	$135,000.00
Bus Washer	3	19.67		10	2	$142,777.60
Cart	2	6.00		10	1	$7,564.81
CNG Refueling Station	1	8.00		25	0	$2,522,235.87
Fuel Island	3	11.33		25	0	$46,015.14

Hoist	1	1.00		20	0	$858.44
Lifts - Fixed	15	11.27		20	0	$36,923.28
Lifts - Portable	7	13.00		10	7	$38,535.19
Misc. Equip	253	9.58		10	113	$49,501.20
Pollution Treatment	1	11.00		20	0	$13,878.03
Scrubber, Sprayer	4	11.50		10	3	$48,088.05
Urban 5307 Subtotal	**346**	**9.62**			**148**	**$62,174.27**
Grand Total	**347**	**9.60**			**148**	**$62,139.18**

4.6 Facilities

The asset inventory contains a listing of all facilities that support the provision of public transportation. This includes administrative offices, maintenance facilities, passenger facilities, parking facilities, and vehicle fueling facilities. The complete facilities inventory is provided in Appendix B.3.

For each facility asset, the inventory records the following information:

- Record Number
- Organization
- Facility Name
- Address

- Facility Type
- Size (square feet)
- Year Built
- Condition Assessment Needed
- Condition Rating (TERM Scale) (Assessed Facilities)
- Funding Program
- Total Replacement Cost ($2026) (Assessed Facilities)

Table 4-5 summarizes the facilities inventory by capital responsibility, funding sub-group, and facility type.

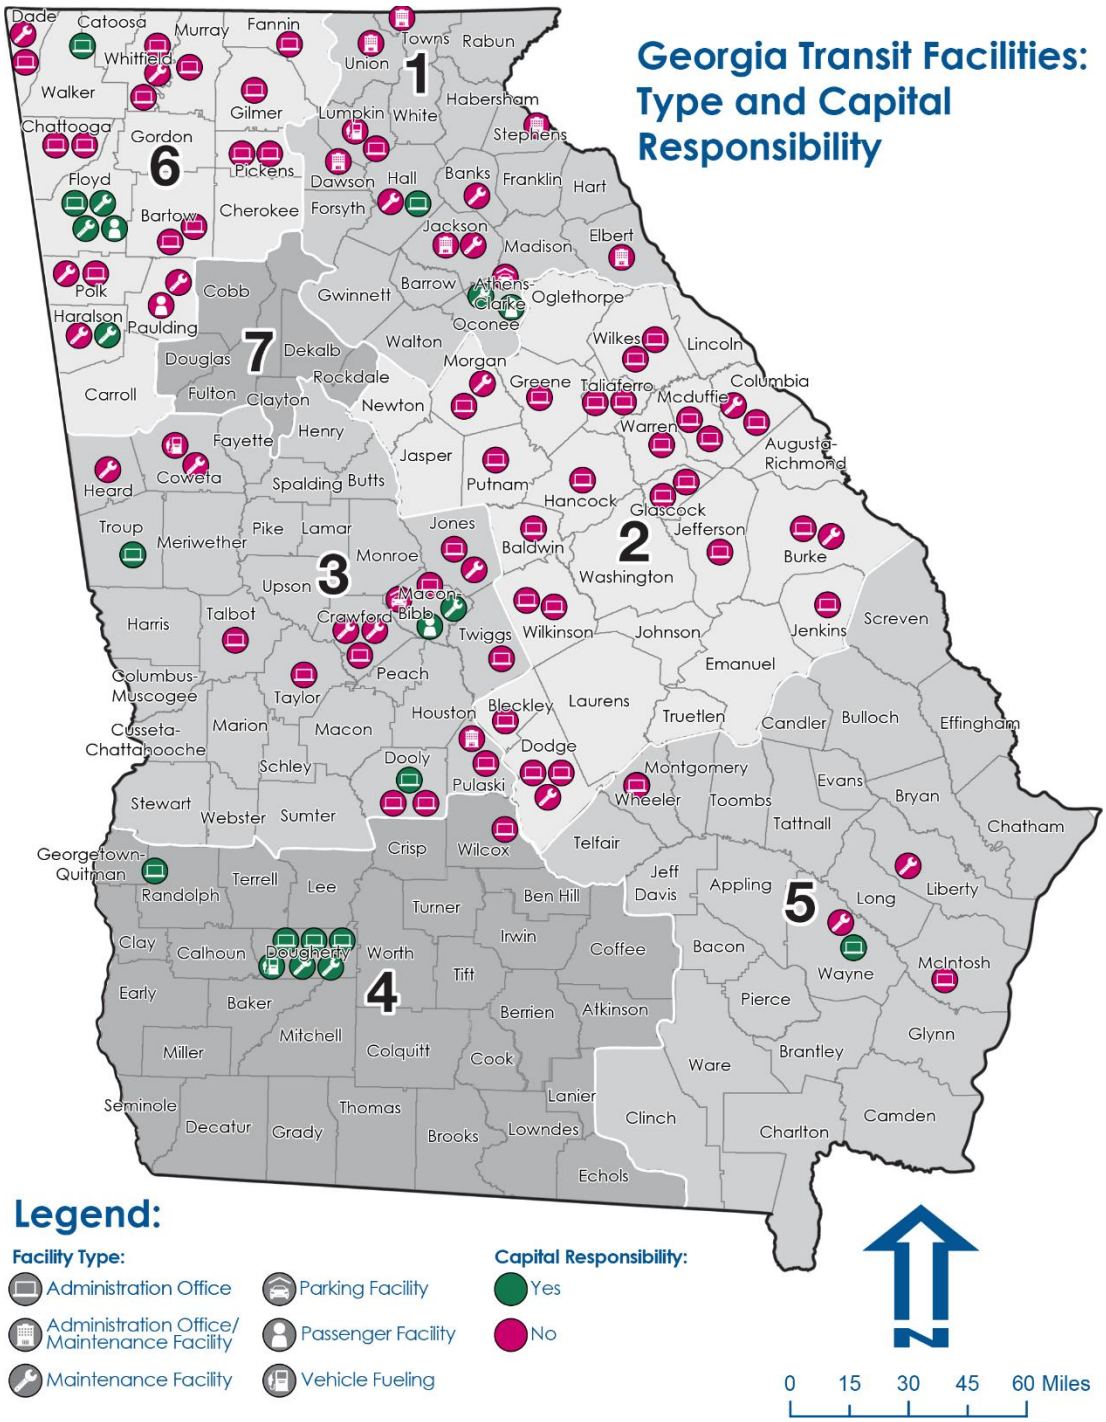

Figure 4-2 displays the location, facility type, and capital responsibility status of facilities included in the GDOT Group TAM inventory.

Table 4-5: Summary of Facilities Inventory by Capital Responsibility and Funding Sub-Group

Capital Responsibility/Sub-Group/ Facility Type	Total Number	Average Age	Condition (TERM RATING Scale)	Number Below 3.0 TERM Rating	Average Replacement Cost ($2026)
Facilities with Direct Capital Responsibility					
Rural 5311 Funding Program					
Administrative Office	5	24.80	4.20	0	$2,947,009.56
Maintenance Facility	2	37.50	4.02	0	$1,554,987.75

Figure 4-2 Map of Facilities Included in the GDOT 2026 Group TAM Inventory

5. Performance Measures and Targets

5.1 Introduction

The FTA Final Rule establishes State of Good Repair (SGR) performance measures for capital assets and requires group TAM Plan sponsors to set performance targets for each of these measures. The purpose of the performance measures is to evaluate whether assets are in a state of good repair and monitor progress toward established performance targets. The FTA final rule at 625.41 states that "A capital asset is in a state of good repair if it meets the following objective standards:

a) the asset is able to perform its desired function.

b) the use of the asset in its current condition does not pose an identified unacceptable safety risk; and

c) the life-cycle investment needs of the asset have been met or recovered, including all scheduled maintenance, rehabilitation, and replacements.

As stated in the Final Rule (49 CFR 625.43), SGR performance measures for capital assets are described as follows:

Rolling Stock: The performance measure for rolling stock is the percentage of revenue vehicles within an asset class that have either met or exceeded their ULB.

Equipment, (non-revenue) service vehicles: The performance measure for non-revenue, support-service, and maintenance vehicle equipment is the percentage of those vehicles that have either met or exceeded their ULB.

Facilities: The performance measure for facilities is the percentage of facilities within an asset class that are rated below condition 3.0 on the Transit Economic Requirements Model (TERM) scale.

Based on these performance measures, inventoried assets were evaluated, and performance targets were established for the applicable asset classes. For rolling stock and equipment assets, performance measures are based on the ULBs identified in Section 4.2. A summary of the asset condition and subsequent performance targets are described in the following section.

5.2 Setting Performance Targets

The FTA final rule requires that Performance Targets be set at the State/local level for each asset class included in the TAM Plan. The applicable FTA requirements are summarized below:

a) General.

   1) One or more performance targets must be set for each applicable performance measure.
   2) A performance target must be set based on realistic expectations, and both the most recent data available and the financial resources reasonably expected to be available during the TAM Plan horizon period.

b) Timeline for target setting.

   1) Performance targets must be established for the following fiscal year for each asset class included in the TAM Plan.
   2) Performance targets must be updated at least once each fiscal year.

c) Role of the accountable executive.

   1) A provider's Accountable Executive must approve each annual performance target.

d) Setting performance targets for group plan participants.

   1) A Sponsor must set one or more unified performance targets for each asset class reflected in the group TAM plan.

2) To the extent practicable, a Sponsor must coordinate its unified performance targets with each participant's Accountable Executive.

e) Coordination with metropolitan, statewide and non-metropolitan planning processes.

1) To the maximum extent practicable, a provider and Sponsor must coordinate with States and Metropolitan Planning Organizations in the selection of State and Metropolitan Planning Organization performance targets.

5.2.1 Historical Performance Results and Established Targets

GDOT establishes annual TAM performance targets and reports performance results through the NTD. **Error! Reference source not found.** summarizes the established targets and reported performance results for FY2023 through FY2025, along with the FY2026 targets. FY2026 performance results were not yet available at the time of this TAM Plan update.

As described in Section 5.1, for revenue vehicles and equipment, performance is measured as the percentage of assets that have met or exceeded their ULB. For facilities, performance is measured as the percentage of facilities rated below 3.0 on the TERM scale. Accordingly, for both measures, lower percentages indicate better performance, and a target is considered met when actual performance is equal to or below the established target.

Historical performance results presented in Table 5-1 were calculated using the ULBs identified in the 2022 TAM Plan and in effect during the applicable reporting periods.

Table 5-1: Historical TAM Performance Targets and Reported Performance Results (FY2023-FY2026)

Asset Category	FY2023 Target	FY2023 Actual	FY2024 Target	FY2024 Actual	FY2025 Target	FY2025 Actual	FY2026 Target	FY2026 Actual	FY2027 Target

BU - Bus (>30')	10%	7%	20%	15%	20%	12%	20%	11%	20%
CU - Cutaway Bus	53%	68%	53%	64%	40%	45%	40%	32%	20%
MV - Minivan	10%	20%	10%	25%	10%	29%	10%	5%	10%
TB - Trolleybus	N/A	0%	0%	0%	0%	0%	0%	0%	0%
VN - Van	10%	34%	20%	64%	50%	62%	50%	19%	30%
Equipment									
AO - Automobile	10%	47%	20%	47%	50%	40 %	50%	20%	50%
Trucks & Other Rubber Tire Vehicles	10%	71%	20%	78%	50%	44%	50%	50%	50%
SV – Sports Utility Vehicle	N/A	N/A	N/A	N/A	N/A	0%	0%	50%	50%
VN – Van	N/A	N/A	N/A	N/A	N/A	N/A	50%	100%	50%
Facilities									

Administrative Facilities	25%	8%	25%	8%	25%	8%	25%
Maintenance Facilities	25%	13%	25%	13%	25%	13%	25%
Parking Facilities	10%	0%	10%	0%	10%	0%	10%
Passenger Facilities	10%	0%	10%	0%	10%	0%	10%

Met Target	Exceeded Target

Historical results show consistent performance for facilities, with all facility categories meeting their targets from FY2023 through FY2025. Performance for revenue vehicles was more variable. Buses greater than 30 feet and trolleybuses met their targets in each year for which targets were established, while the other revenue vehicle categories shown in **Error! Reference source not found.** remained above their established targets. Equipment performance improved relative to the established targets, with automobiles, trucks, and other rubber tire vehicles meeting their FY2025 targets after not meeting them in FY2023 and FY2024. For sport utility vehicles, FY2025 performance was reported at 0 percent, with no target established for that year.

From FY2024 to FY2025, performance improved for most revenue vehicle and equipment categories, as reflected by decreases in the percentage of assets at or beyond their ULB. The largest decreases were observed for cutaway buses, from 64 percent to 45 percent, and trucks and other rubber tire vehicles, from 78 percent to 44 percent. Trolley bus performance remained at 0 percent, while minivans were the only category with an increase, from 25 percent to 29 percent.

As discussed in Section 4.2, GDOT reviewed and updated selected ULBs as part of the 2026 TAM Plan update to better reflect the expected useful life of assets in service. The updated ULBs will be used for future performance target setting and reporting.

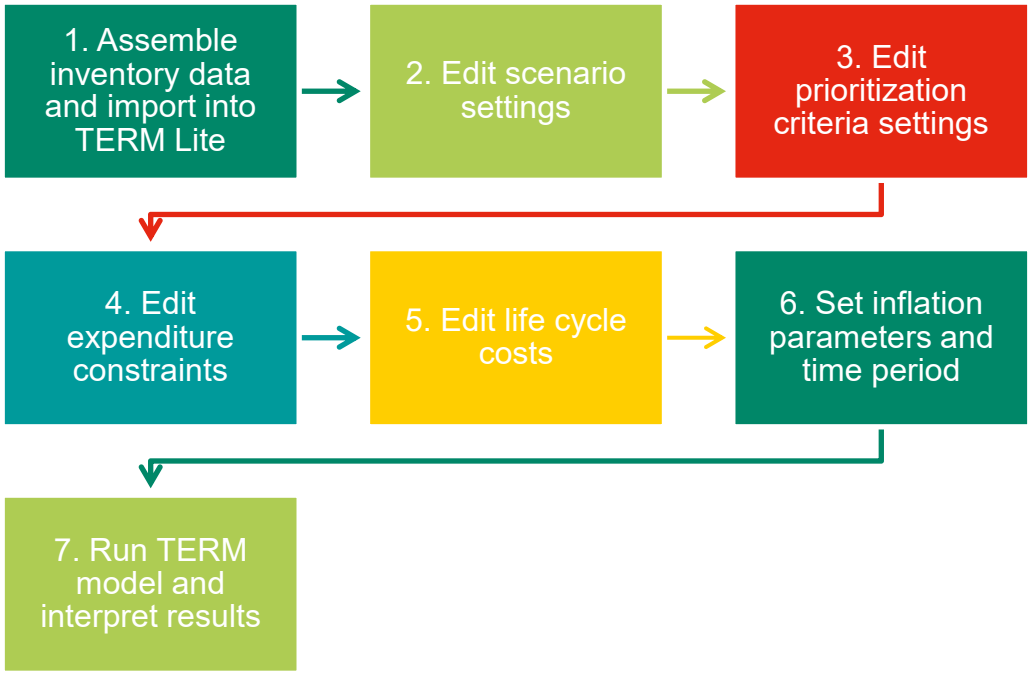

5.2.2 Performance Targets for the Upcoming Reporting Period

At the time of this TAM Plan update, FY2026 NTD reporting had not been completed and performance targets for the subsequent reporting period (FY2027) had not yet been established. Targets for the upcoming reporting period will be developed considering historical performance, the updated ULBs identified in this TAM Plan, the current asset inventory, expected asset replacements, and anticipated funding.

6. Decision Support Tool

The FTA TERM Lite Analysis Tool runs on a Microsoft Access platform and allows users to evaluate the lifecycle costs of transit assets. This chapter describes the processes followed to run TERM Lite for the asset inventory. Figure 6-1 provides an overview of the main steps followed to run TERM Lite for this plan.

Figure 6-1 Decision Support Tool Process Diagram

6.1 Assemble Inventory Data and Import into TERM Lite

The TERM Lite tool is used to perform lifecycle cost analyses on a set of transit assets maintained in an inventory. The GDOT Group TAM Plan Asset Inventory was compiled using data from multiple sources, including the 2022 GDOT Group TAM Plan, 2025 NTD records, BlackCat Transit Data Management System records as of July 1, 2026, and information reviewed and validated by participating transit providers.

Inventory data from these sources were consolidated and formatted to conform to the TERM Lite data fields, facilitating the import of inventory data into TERM Lite for analysis.

Additionally, the following data fields must be completed for each asset prior to import into TERM Lite: Mode, Description, Asset Classification, Quantity, Year Built, Replacement Cost, Cost Year, and Priority.

6.2 Edit Scenario Settings

TERM Lite is a database model that runs in Microsoft Access. Therefore, separate database files need to be maintained for each type of scenario. For each scenario, prioritization settings and the expenditure constraints were edited to replace the default model values.

6.3 Edit Prioritization Criteria Settings

The TERM Lite tool allows users to specify weights for five prioritization criteria: asset condition, safety and security, reliability, operation and maintenance cost impact and a user defined criterion. TERM Lite assigns scores for each inventory line item and uses these scores to prioritize asset investments. For the GDOT Group TAM Plan investment prioritization, the only criterion used was asset condition. Asset condition was therefore given a weight of 100%.

6.4 Edit Expenditure Constraints

The expenditure constraints allow a user to specify how much funding will be available in each analysis year.

6.5 Edit Lifecycle Costs

The TERM Lite tool allows users to determine the timing and costs associated with each asset type over its lifecycle. Typical costs include replacement, rehabilitation, and annual capital maintenance. The timing for each activity is

specified as a percentage of useful life for each asset type. The analysis for the GDOT Group TAM Plan considered asset end-of-life replacement costs.

6.6 Set Inflation Parameters and Time Period

Two options are provided for setting inflation parameters: base year dollars and year of expenditure dollars. The "base year dollars" option shows expenditure forecasts in the analysis start year dollars, while year of expenditure dollars inflates each forecasted annual expenditure by a user defined inflation rate. All expenditure forecasts for facilities components and vehicles were specified in base year dollars using 2026 as the analysis start year. Equipment base year dollars varied based on verified data and were input and adjusted automatically by TERM Lite to 2026-year dollars when the scenarios were executed.

Lastly, a period of 20 years was set for the analysis. Although the TAM plan only covers a four-year period, TERM Lite only runs analyses for 20- or 30-year time horizons.

6.7 Run TERM Model and Interpret Results

Once all model parameters have been set, the TERM Model can be run, and results interpreted to support decision making. The results of the TERM Lite analysis are presented and discussed in the next section, Capital Investment Prioritization.

7. Capital Investment Prioritization

7.1 Process Summary

The FTA TAM Rule requires transit providers to identify and prioritize investments that support the achievement and maintenance of a state of good repair. To support investment planning, GDOT analyzed the condition and replacement needs of assets for which participating agencies have capital responsibility using the TERM Lite modeling tool.

The analysis was conducted using both unconstrained and constrained funding scenarios. The unconstrained scenarios assume that all identified asset replacement and rehabilitation needs can be funded when they occur, providing an estimate of total investment needs and future SGR requirements. The constrained scenarios reflect anticipated funding levels available through GDOT's federal transit funding programs and therefore represent a more realistic projection of how asset conditions and backlog may evolve over time.

In this plan, asset investments were evaluated separately by sub-group in accordance with the different FTA funding types received by the plan participants: 5311 Rural and 5307 Small Urban. Three unconstrained scenarios were developed:

- A combined 5307 and 5311 unconstrained scenario representing all assets for which participating agencies have capital responsibility.
- A 5307 unconstrained scenario
- A 5311 unconstrained scenario

In addition, constrained scenarios were developed for revenue vehicles using anticipated annual funding levels from GDOT's State Fiscal Year (SFY 2027) Program of Projects:

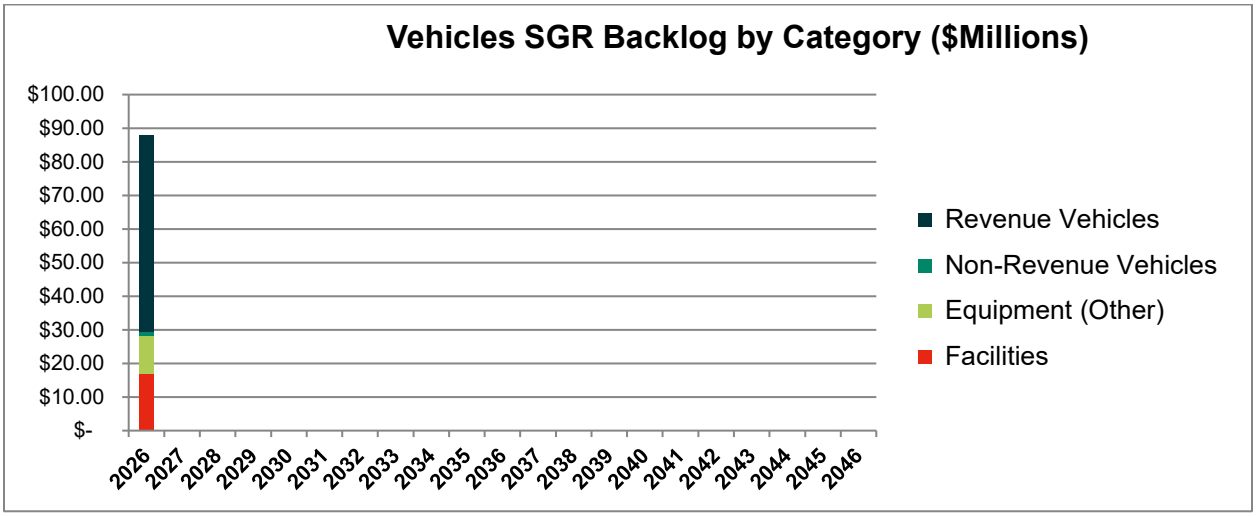

- 5307 Revenue Vehicles: $2.68 million annually
- 5311 Revenue Vehicles: $7.61 million annually

No equipment or facility funding was assumed in either constrained scenario. As a result, the constrained analyses focus on revenue vehicle replacement needs and the projected evolution of vehicle backlog under currently anticipated funding levels.

7.2 Systemwide State of Good Repair Investment Needs

The combined unconstrained scenario provides a systemwide view of the current SGR backlog across all assets for which participating agencies have capital responsibility.

Figure 7-1: Combined 5307 and 5311 Current SGR Backlog

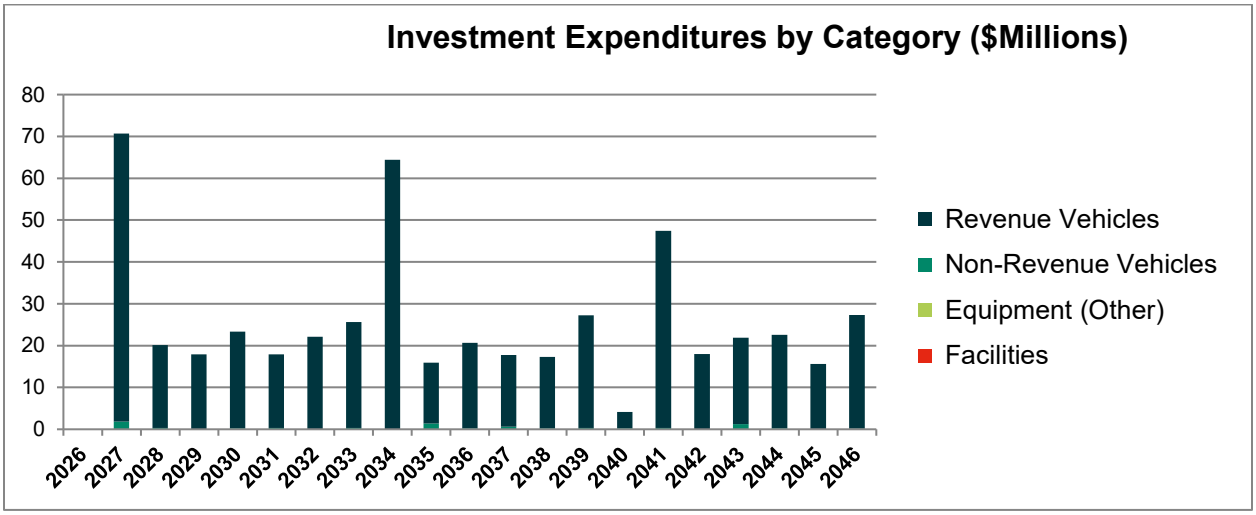

As shown in Figure 7-1, the total existing SGR backlog is approximately $87.9 million. Revenue vehicles account for the largest share of the backlog at $58.4 million, representing approximately two-thirds of total identified needs. Facility assets account for $17.1 million of backlog, while equipment and non-revenue vehicles account for an additional $11.0 million and $1.4 million, respectively.

The predominance of revenue vehicle needs reflects both the size of the fleet and the presence of assets approaching or exceeding their useful life benchmarks. As a result, revenue vehicle replacement remains the highest investment priority across the GDOT Group TAM portfolio.

While the unconstrained scenario assumes all current backlog is addressed immediately, the resulting expenditure profile demonstrates that substantial reinvestment will continue to be required throughout the 20-year analysis period, as shown in Figure 7-2.

Figure 7-2: Combined 5307 and 5311 Unconstrained Expenditure Needs

The model projects recurring investment requirements as assets age and reach the end of their useful lives. Revenue vehicles continue to represent the largest future expenditure category, with replacement needs occurring throughout the planning horizon.

7.3 Small Urban 5307 Investment Needs

7.3.1 Unconstrained Scenario

The unconstrained 5307 scenario provides an assessment of the current state of good repair needs for 5307 funded assets.

Figure 7-3: 5307 Unconstrained Current SGR Backlog

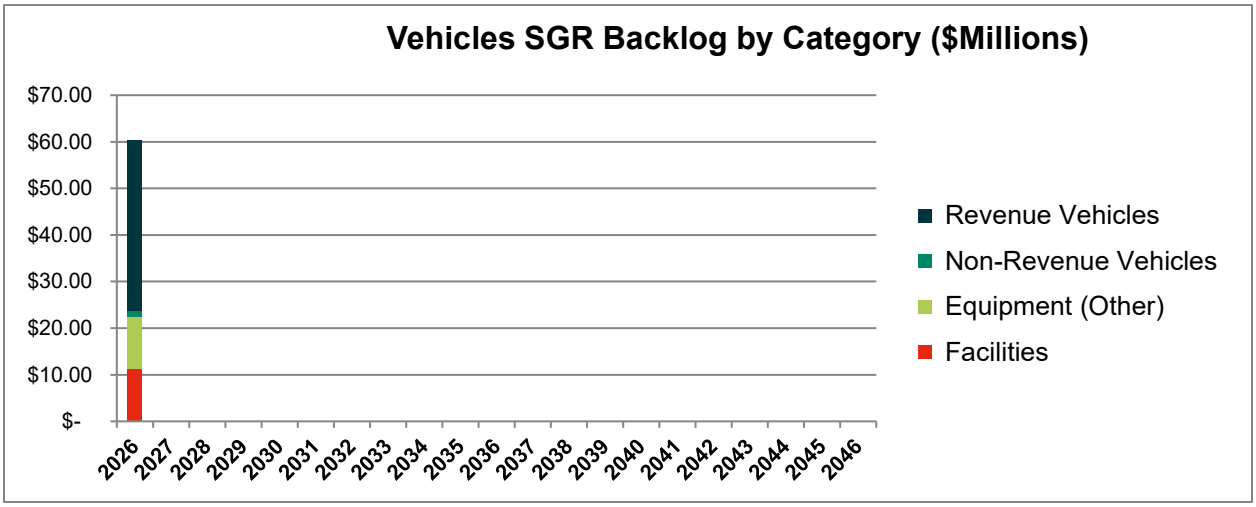

Figure 7-3 shows the current SGR backlog for 5307 assets. The analysis identified approximately $60.4 million in backlog, with revenue vehicles accounting for the largest share at $36.6 million, followed by facilities ($11.4 million), equipment ($11.0 million), and non-revenue vehicles ($1.4 million). These results indicate that revenue vehicle replacement represents the most significant capital need within the Section 5307 asset portfolio.

Figure 7-4: 5307 Unconstrained Expenditure Needs

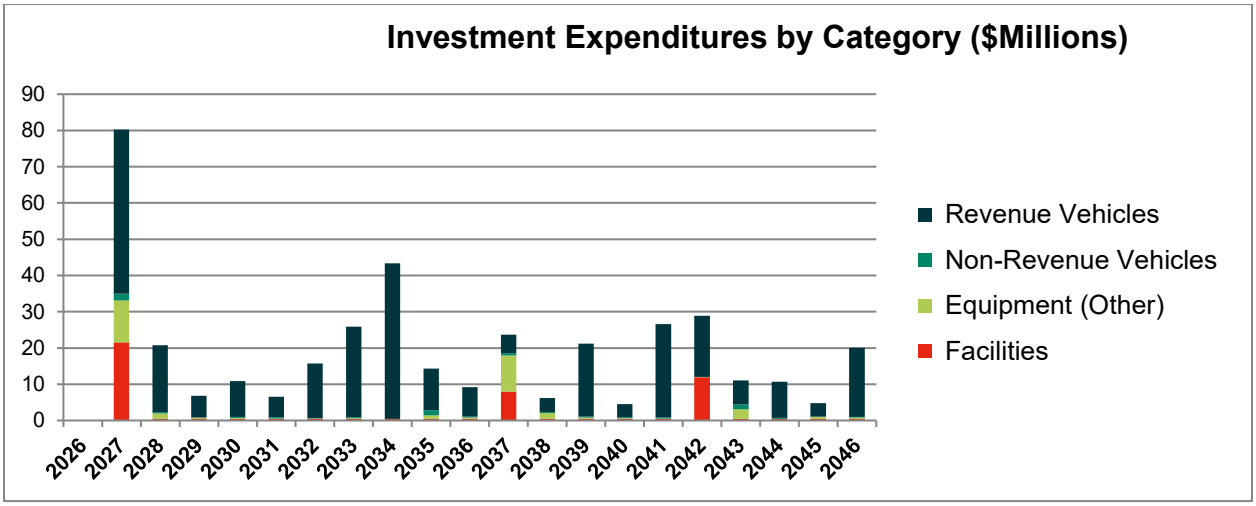

Figure 7-4 presents the projected expenditures required to maintain 5307 assets in a state of good repair over the 20-year planning horizon. The results indicate that revenue vehicle replacement will continue to represent the largest investment need, reinforcing its importance as a capital investment priority.

7.3.2 Constrained Scenario

The constrained 5307 scenario was developed using an annual vehicle funding level of approximately $2.68 million, consistent with GDOT's SFY 2027 Program of Projects. The analysis evaluates the effect of this funding level on the replacement of 5307 revenue vehicles over the planning horizon.

Figure 7-5: 5307 Revenue Vehicle Backlog Under Constrained Funding Scenario

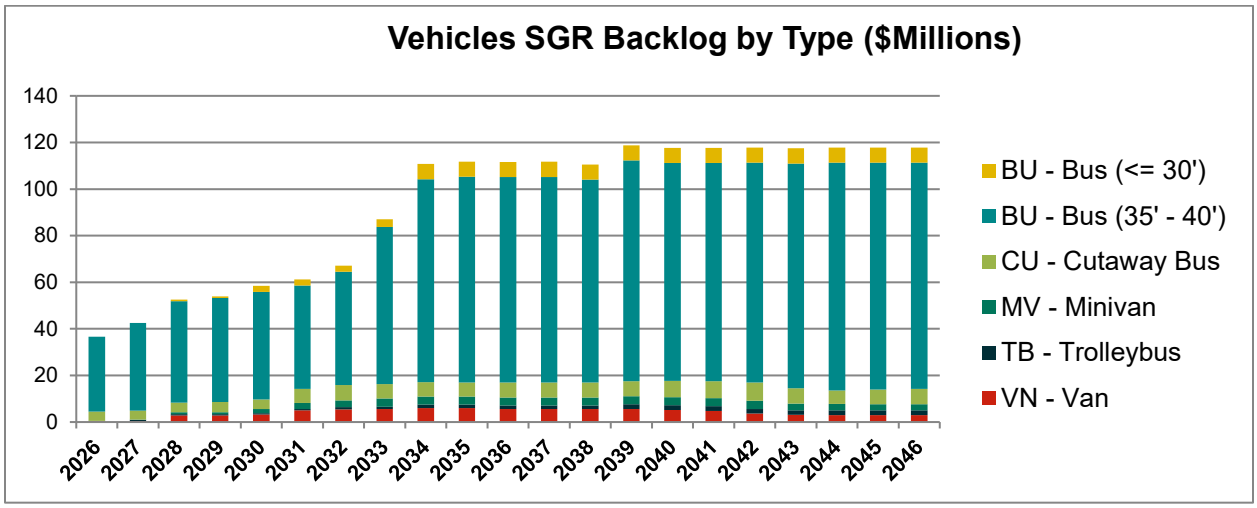

Figure 7-5 presents the projected revenue vehicle backlog under the constrained funding scenario. The total backlog increases from approximately $36.6 million in 2026 to approximately $117.8 million in 2046. The projected backlog is driven primarily by BU - Bus (35' - 40'), which accounts for the majority of the backlog throughout the analysis period.

Figure 7-6: 5307 Revenue Vehicle Expenditure by Vehicle Type Under Constrained Funding Scenario

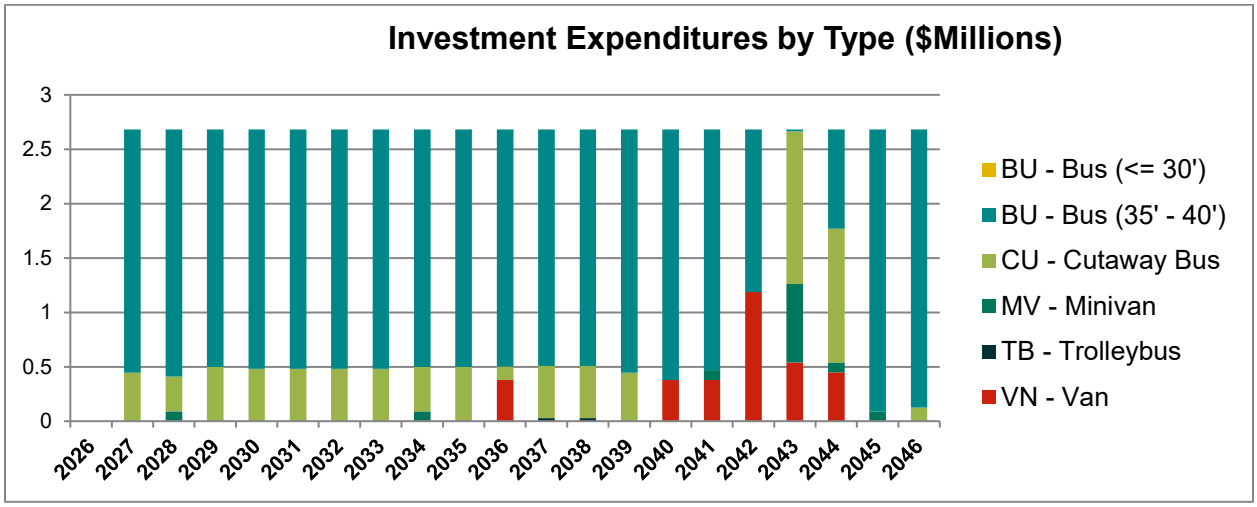

Figure 7-6 presents projected vehicle replacement expenditures under the constrained scenario. Given the level of identified replacement needs, the annual funding amount of approximately $2.68 million for 5307 revenue vehicles would be fully expended throughout the planning horizon. Most expenditures are directed toward BU - Bus (35' - 40') replacements, with smaller investments in other vehicle types occurring as replacement needs arise.

7.4 Rural 5311 Investment Needs

7.4.1 Unconstrained Scenario

The unconstrained 5311 scenario provides an estimate of total investment needs to maintain rural transit assets in a state of good repair.

Figure 7-7: 5311 Unconstrained Current SGR Backlog

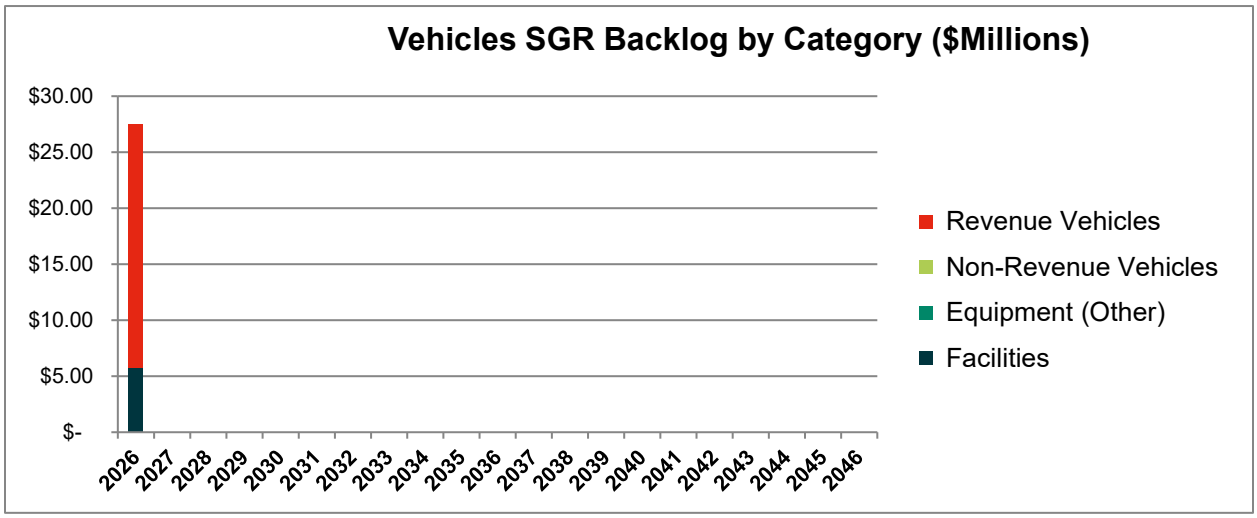

Figure 7-7 shows the current SGR backlog for the 5311 program assets. The analysis identified approximately $27.5 million in backlog, with revenue vehicles accounting for approximately $21.7 million, or nearly 80 percent of the total backlog. Facility assets account for approximately $5.7 million backlog. Similar to the 5307 assets, the results indicate that revenue vehicle replacement represents the primary SGR investment need within the 5311-asset portfolio.

Figure 7-8: 5311 Unconstrained Expenditure Needs

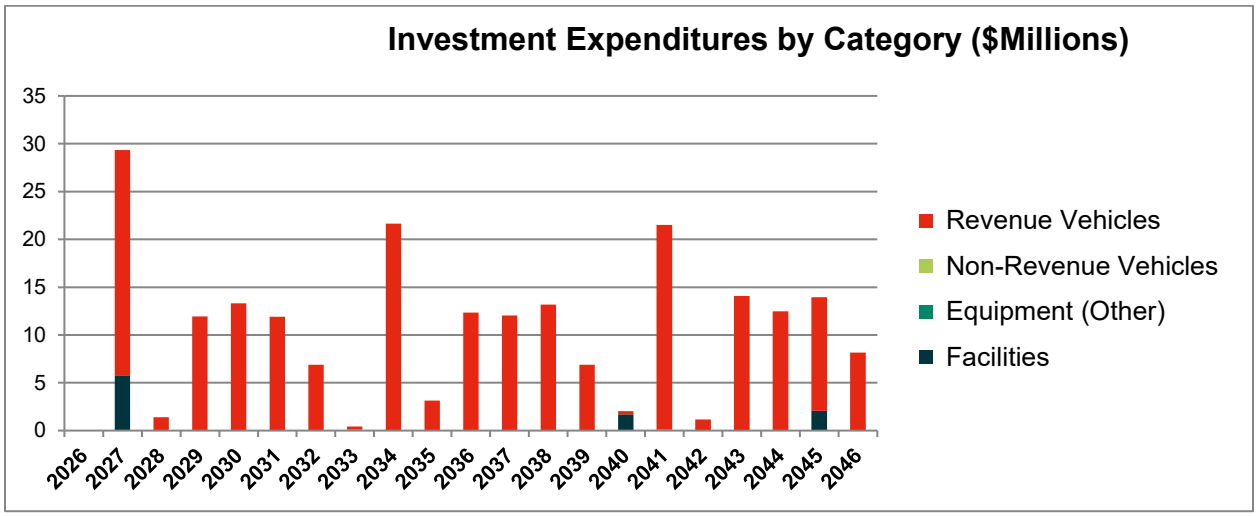

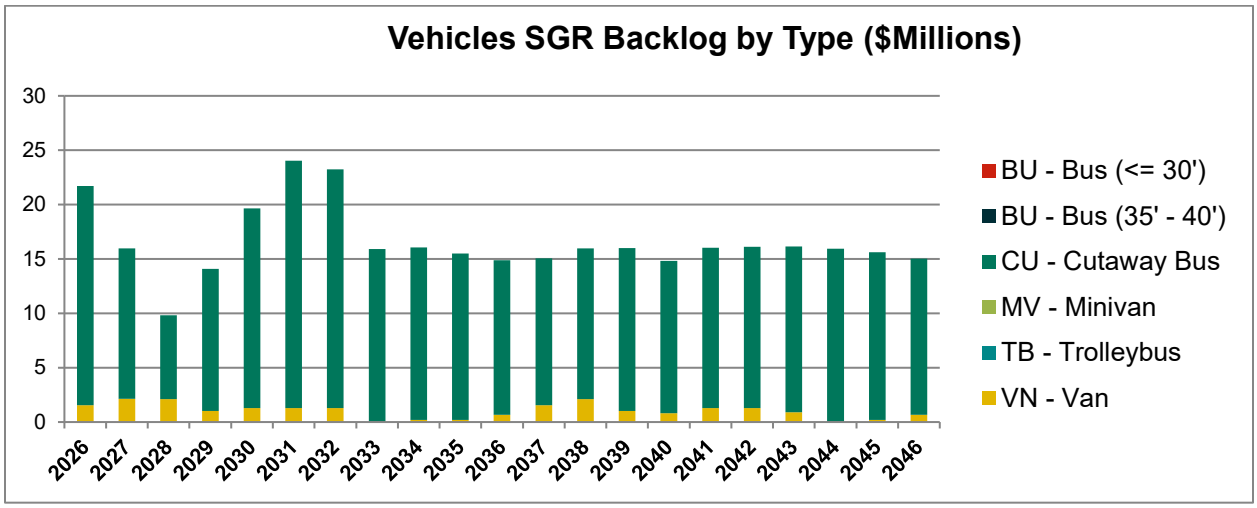

Figure 7-8 shows the projected expenditures required to maintain 5311 assets in a state of good repair over the 20-year planning horizon.

7.4.2 Constrained Scenario

A constrained scenario was developed using anticipated annual 5311 revenue vehicle funding of approximately $7.61 million.

Figure 7-9: 5311 Revenue Vehicle Backlog Under Constrained Funding Scenario

Unlike the 5307 scenario, the modeled funding level for 5311 revenue vehicles is projected to address a significant portion of future replacement needs. As shown in Figure 7-9, the vehicle backlog decreases from approximately $21.7 million in 2026 to approximately $15 million by the end of the planning period, representing a reduction of roughly 30 percent. The majority of the backlog remains associated with CU - Cutaway Bus, which represents the largest share of identified replacement needs.

Figure 7-10: 5311 Revenue Vehicle Expenditure by Vehicle Type Under Constrained Funding Scenario

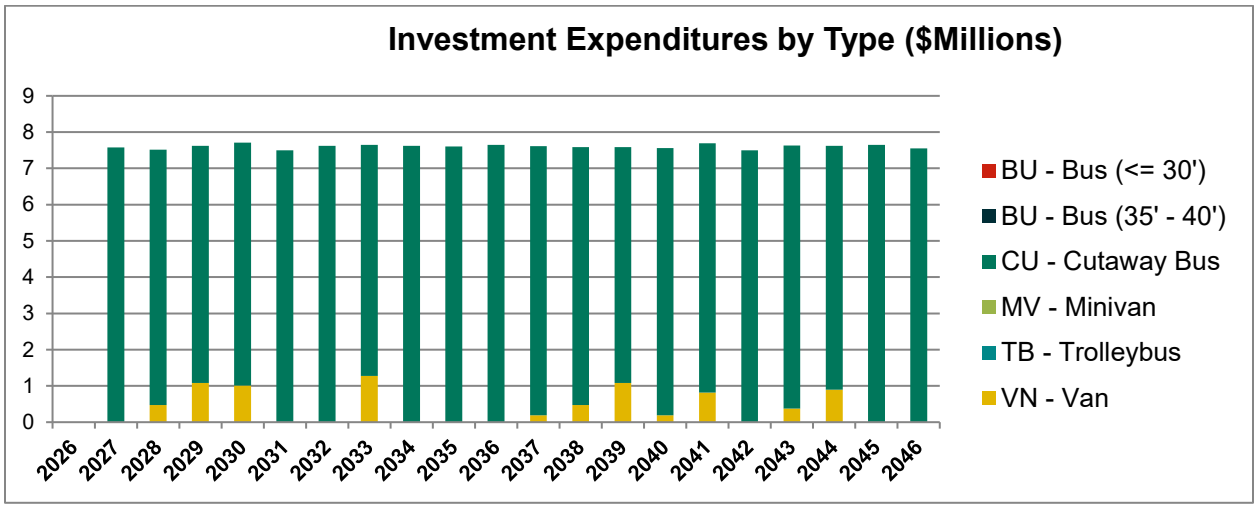

Figure 7-10 presents projected vehicle replacement expenditures under the constrained scenario. Given the level of identified replacement needs, the annual funding amount of approximately $7.61 million for 5311 revenue vehicles would be substantially utilized throughout the planning horizon. Annual expenditures vary slightly based on replacement timing, with any unexpended funding available to be carried forward to future years. Most expenditures are associated with CU - Cutaway Bus replacements, with smaller investments occurring in other vehicle types as replacement needs arise.

7.5 Capital Investment Priorities

The constrained funding scenarios described in this chapter provide the basis for the project-based investment priorities included in Appendix C. Appendix C summarizes the anticipated revenue vehicle capital investments and replacement quantities for FY2027-FY2030 under the funding assumptions used in this TAM Plan.

The TERM Lite analysis indicates that revenue vehicles represent the highest capital investment priority across the GDOT Group TAM portfolio. Revenue vehicles account for the largest share of the current SGR backlog and

projected future investment needs under both the 5307 and 5311 programs. Accordingly, GDOT currently prioritizes available capital funding toward revenue vehicle replacement activities that support the achievement and maintenance of a state of good repair.

As additional funding becomes available, other asset categories, including service vehicles and other support equipment, will also be eligible for funding. Facility investments are generally identified through agency needs and funding requests. Based on the most recent condition assessment results, the City of Albany Transit Utility Storage facility received a TERM condition rating of 2.67, making it the only facility in the Group TAM inventory with a condition rating below 3.0. GDOT anticipates receiving a funding request to address the facility's condition needs and restore it to a state of good repair.

8. Conclusion

The GDOT Group Transit Asset Management Plan provides a strategic outlook for maintaining transit assets in a state of good repair and supporting investment decision-making for participating transit providers through FY2030. The Plan incorporates updated asset inventory information, facility condition assessments, useful life benchmark evaluations, and prioritization analyses to identify current and future capital reinvestment needs.

The analysis identified approximately $87.9 million in state of good repair backlog across assets for which participating agencies have capital responsibility. Revenue vehicles represent the largest share of these needs and therefore remain GDOT's highest capital investment priority. Continued investment in vehicle replacement, particularly cutaway buses serving rural transit systems and larger fixed-route buses serving urban transit systems, will be critical to sustaining transit service throughout Georgia.

Anticipated funding levels will support continued investment in transit assets throughout the planning period. However, prioritization of capital needs will remain necessary to direct limited funding toward the highest-priority asset needs. Current funding assumptions for the Rural 5311 program are projected to substantially reduce vehicle backlog over time, while funding available for the Small Urban 5307 program is not sufficient to address all identified replacement needs. Nevertheless, the investment strategies presented in this TAM Plan provide a practical and data-driven approach for preserving transit assets and supporting the long-term provision of public transportation services throughout Georgia.

Appendix A FTA TERM Rating Scale

Table A- 1 presents the FTA Transit Economic Requirements Model (TERM) Rating Scale used to assess facility condition.

Table A- 1: FTA TERM Rating Scale

Rating	Condition	Description
5	Excellent	No visible defects, new or near new condition, may still be under warranty if applicable
4	Good	Good condition, but no longer new; may be slightly defective or deteriorated, but is overall functional
3	Adequate	Moderately deteriorated or defective, but has not exceeded useful life
2	Marginal	Defective or deteriorated; in need of replacement; exceeded useful life
1	Poor	Critically damaged or in need of immediate repair; well past useful life

The sub-component ratings were aggregated to calculate an overall condition rating for each facility. A weighted average method was used in the calculation, with facility sub-components weighted according to their estimated percentage of the total facility replacement cost. The weights were developed using general data representative of typical maintenance and administrative facilities. The calculation for facility rating is shown below.

Final facility ratings were used to calculate performance for the asset category. For TAM performance reporting purposes, facilities with an overall TERM rating below 3.0 are considered not to be in a State of Good Repair. However, the raw sub-component ratings provided by the facility owners were used to identify future facility rehabilitation projects.

Appendix B Asset Register

B.1 Revenue Vehicles

Table B- 1: GDOT Revenue Vehicles Asset Register, 2026

Record	Organization	VIN	Description	Make_Model	Vehicle Type	Vehicle Year	Replacement Cost (2026$)	Mileage	ULB	Funding Program
1	Athens-Clarke County Transit	15GGD271791177013	Gillig Corporation BU - Bus	G27D102N4	BU - Bus (35' - 40')	2009	$725,000.00	383,589	14	5307

Appendix C Proposed Investment Project List

Appendix C presents the prioritized revenue vehicle investment program developed from the constrained funding scenarios described in Chapter 7. The appendix summarizes projected capital allocations and vehicle replacement activities for the Small Urban (5307) and Rural (5311) sub-groups over the FY2027-FY2030 TAM Plan horizon period. These projects reflect GDOT's current investment priorities based on funding levels expected to be available.

C.1 5311 Program Investment

Table C- 1: Rural (5311) Revenue Vehicle Capital Investment Amounts, 2027-2030

Asset Category	2027	2028	2029	2030	Total
CU - Cutaway Bus	$7,580,000.00	$7,050,000.00	$6,535,000.00	$6,705,000.00	**$27,870,000.00**
