Conformity Determination Report – Short Form Gainesville-Hall Metropolitan Transportation Planning Process

Regional Transportation Plan: ***GHMPO 2040 RTP: 2015 Update***

Transportation Improvement Program: ***FY 2016-2019***

Nature of Action:

- Administrative Modification
- Amendment - Number **4**
 - Planning Action Only
 - New Emissions Analysis Required

A full list of all proposed changes is attached to this form. Administrative Modifications and Planning Action Amendments do not impact financial constraint of the TIP or RTP, as any increase in federal funds will be drawn from existing program balances, as verified by the Georgia Department of Transportation. There are also no changes to the scope or schedule of any non-exempt status project, as defined in 40 Code of Federal Regulations Part 93, which would require updating the regional emissions analysis.

Date of Last Conforming Emissions Analysis:

September 2015

The above dated Conformity Determination Report was found by FHWA and EPA to meet the transportation requirements of the Clean Air Act set forth in 40 Code of Federal Regulations Part 93. The Atlanta Nonattainment Area meets all motor vehicle emissions budgets and conformity tests established through the State Implementation Plan and via Interagency Consultation for both the 1997 annual PM2.5 and the 2008 eight-hour ozone standards.
